

Beyond eyesight There are other ways to see

Tarantula

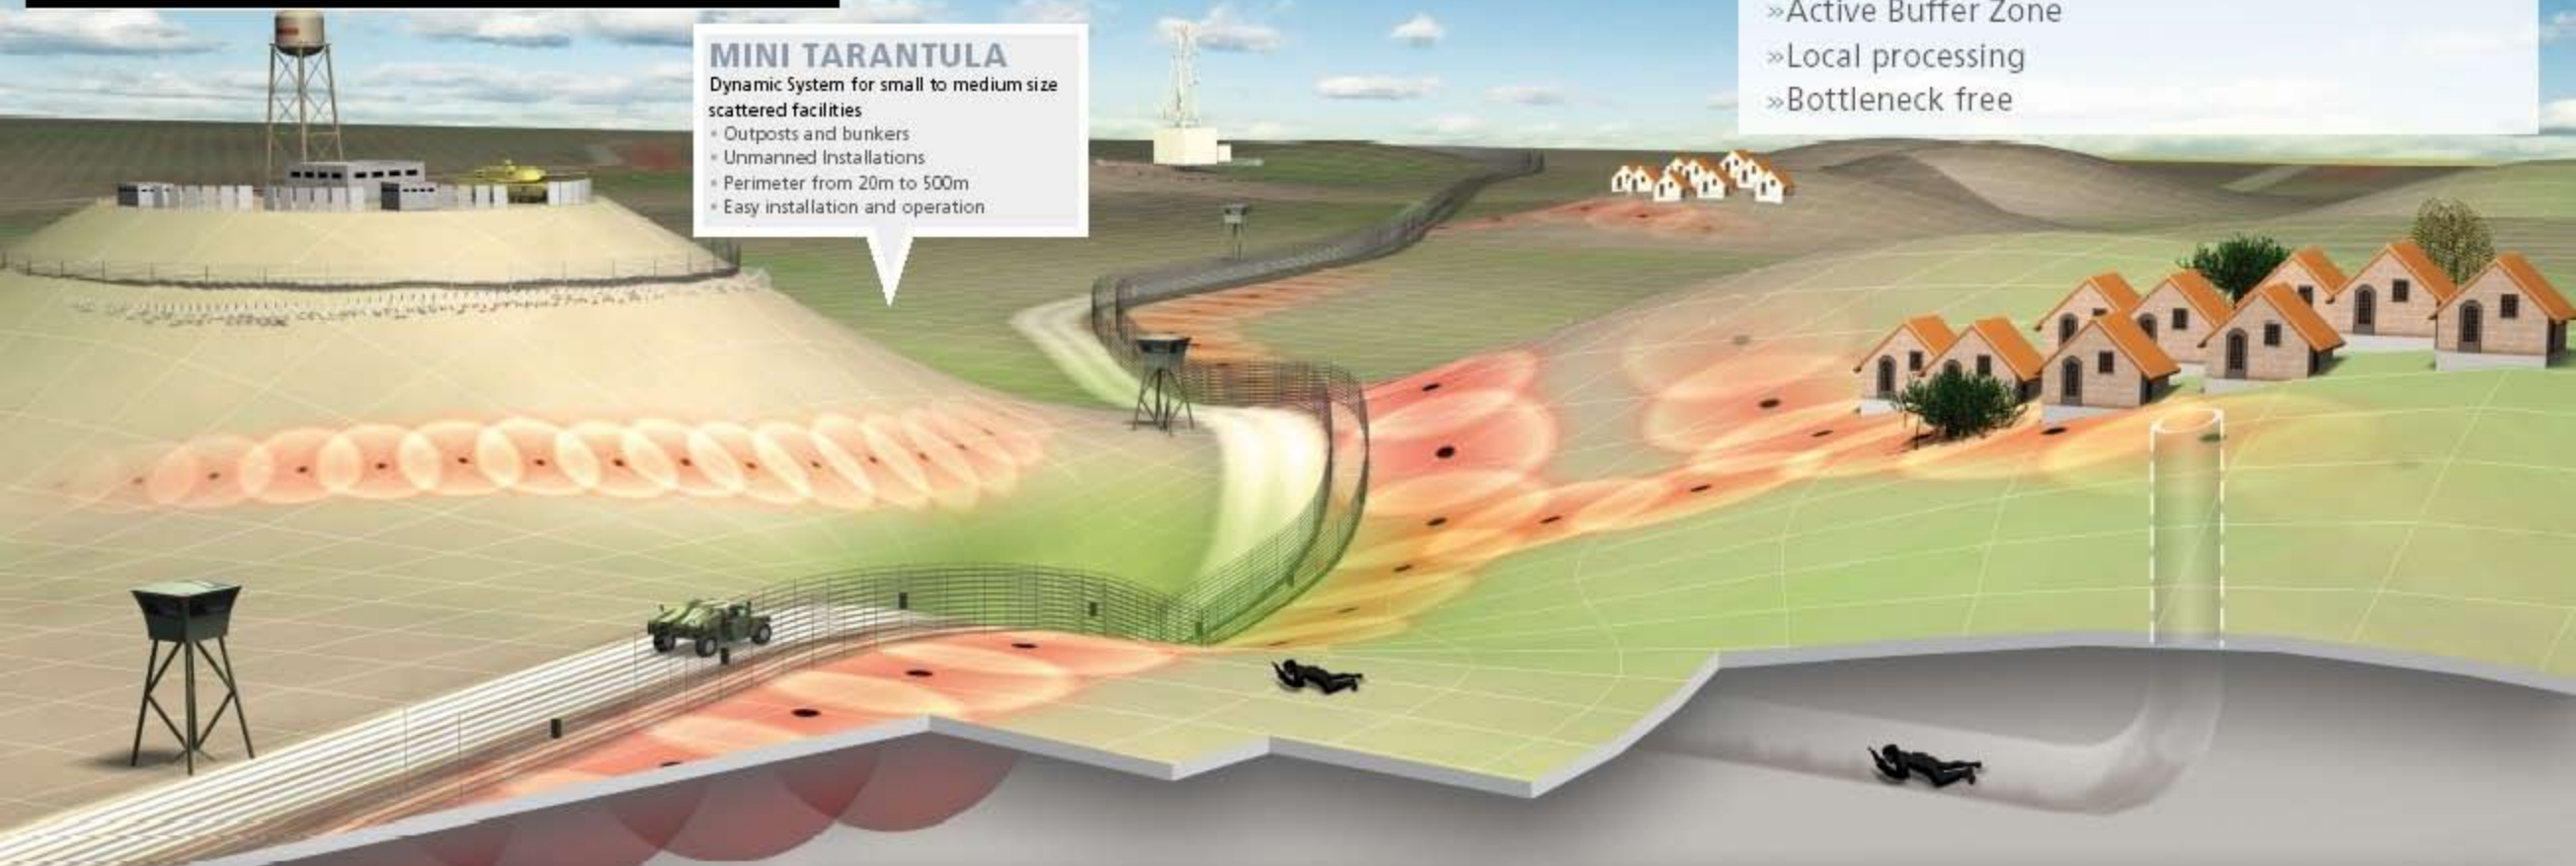

Total Virtual Fence Security for Border Protection

- » Enhanced localizing of events
- » Surface and Underground Detection
- » Low FAR
- » Active Buffer Zone
- » Local processing
- » Bottleneck free

MINI TARANTULA

Dynamic System for small to medium size scattered facilities

- Outposts and bunkers
- Unmanned Installations
- Perimeter from 20m to 500m
- Easy installation and operation

VIRTUAL FENCE APPLICATION

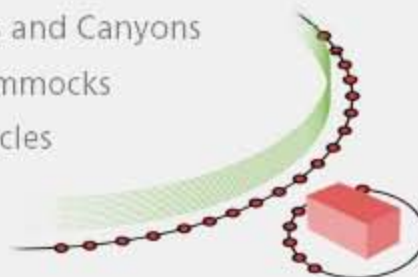

- Unique 3D seismic sensor
- Target classification
- Event positioning
- Weatherproof
- Single calibration
- Deception proof – passive system

SMART DEPLOYMENT

Array Displacement Capabilities for Challenging Terrain

- Out of site areas
- Small Valleys and Canyons
- Hills and Hummocks
- Urban Obstacles

UNDERGROUND SCANNER

Detects tunneling and underground movement

- Alerts to a depth of 35m
- Enhanced localizing of events
- Detects and classifies human activity
- Underground– excavating, crawling

Fast deployment version available to detect rapid changes in underground activity
